MICROSOFT CLOUD ACCELERATOR PROGRAM

Edgile Microsoft Compliance Workshops (Sensitive Data, Manage and Investigate Risk)

Discover, protect, and govern your corporate data

| Security |
| Identity |
| **Compliance** |

Managing digital data across the modern workforce is a huge challenge

Managing data used to involve just dealing with documents and emails. Not anymore.

The growth of digital technology and the rapid shift to a remote workforce have greatly expanded the information universe, which now also includes messaging, videos, images and IoT. Much of this digital data becomes stale or irrelevant soon after creation but may contain information that could create compliance risks across the enterprise.

Edgile—Microsoft's #1 security and compliance partner—will assess your strategic compliance objectives

Do you know what data you have, where it is and how it's being used? Are all of your compliance risks visible?

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. But too many regulated companies aren't even aware that they may have petabytes of unstructured data in every corner of their cloud and on-premises environments.

These two-day Microsoft Compliance Workshops, delivered by Gold Partner Edgile, will show you how to leverage the automated discovery tools in Microsoft 365. We can do this to uncover sensitive data, investigate and manage risk, or both.

Edgile will run a Data Risk check on top of your cloud infrastructure to identify potential compliance risks. This 6-step automated discovery process will analyze your existing data for:

- Sensitive information and intellectual property
- Unused or "stale" data
- Unusual activities
- Dark data compliance risks

1 Acquire and Setup Licenses	2 Configure & enable discovery services	3 Analysis & Findings	4 Write-up	5 Present findings & recommendations	6 Decommission

Automated Discovery

The workshop is available for a limited time and Microsoft covers all costs.

Ready to get started?

STEP ❶

Check eligibility requirements

This Microsoft Compliance Workshop is open to US-managed customers with:

- 1,000+ Paid Available Units (PAU) for Azure Active Directory Premium (AADP PAU)
- 250+ Monthly Active Users (MAU) for Exchange Online, SharePoint Online or Teams
- Customer TPID.

Customers are eligible for one Microsoft Cloud Accelerator Program workshop per fiscal year.

STEP ❷

Contact Edgile
