MODERN SECURITY DRIVES EFFECTIVE COMPLIANCE

MICROSOFT CLOUD ACCELERATOR PROGRAM

Edgile Microsoft Security Workshops (Threat Protection and Microsoft Sentinel)

Upgrade your security posture for the long term

Security

Identity

Compliance

How secure is your organization's hybrid environment?

Do you know how many phishing attacks have hit your company? Are your employees using the right password protocols? Do you have full visibility into immediate threats?

Organizations are managing a growing volume of identities, data, applications, devices and infrastructure, all while dealing with tight budgets and vulnerable legacy systems. In this environment, minimizing security risks is a massive challenge.

Edgile—Microsoft's #1 security and compliance partner—will strengthen your security using M365 licenses you already own

These two-day Microsoft Security Workshops, delivered by Gold Partner Edgile, will showcase security scenarios using hands-on-activities that will help you develop a strategic plan.

Identify ongoing risks to your cloud environment

Experience integrated security using modern tools and methods

Document your security strategy for the benefit of key stakeholders

Develop joint plans and next steps.

Analyze your active cloud and on-premises threats

The workshop can be delivered as a Threat Protection workshop highlighting Microsoft 365 Security Tools, as an Microsoft Sentinel workshop for insights on active threats to your cloud environment, or we can do both. Edgile will help you:

- Analyze requirements and priorities for a SIEM deployment
- Gain visibility into threats across email, identity and data
- Create a defined deployment roadmap based on your environment and goals.

The workshop is available for a limited time and Microsoft covers all costs.

“

As remote workforces become the norm, it's essential to develop a strategic plan to mitigate and protect against threats.

– Bob Moore, Edgile
Managing Director

”

Ready to get started?

STEP 1

Check eligibility requirements

This Microsoft Security Workshop is open to US-managed customers with:

- 1,000+ Paid Available Units (PAU) for Azure Active Directory Premium (AADP PAU)
- 250+ Monthly Active Users (MAU) for Exchange Online, SharePoint Online or Teams
- Customer TPID.

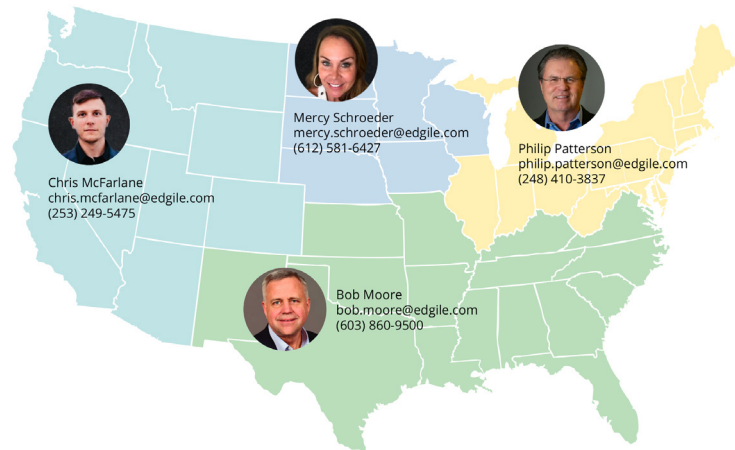

Customers are eligible for one Microsoft Cloud Accelerator Program workshop per fiscal year.

STEP 2

Contact Edgile

To learn more about how Microsoft 365 security can improve your business outcomes, please contact the Edgile representative in your area.
