

# Microsoft Security

End-to-end security solutions and services through Microsoft security stack

In the present digital era, enterprises are dealing with a multitude of identities through various personas and connected things. The enterprise data, applications and servers' residency have been moving from on premise governed zones to multi cloud environments. The explosion of cloud and mobile applications along with rapid adoption of cloud workloads have opened huge security risk postures and widened the gap with on premise centric security solutions that work in silos. To combat and stop advanced threats, enterprises need easily deployable, multi-layered and integrated security solutions with cognitive intelligence.

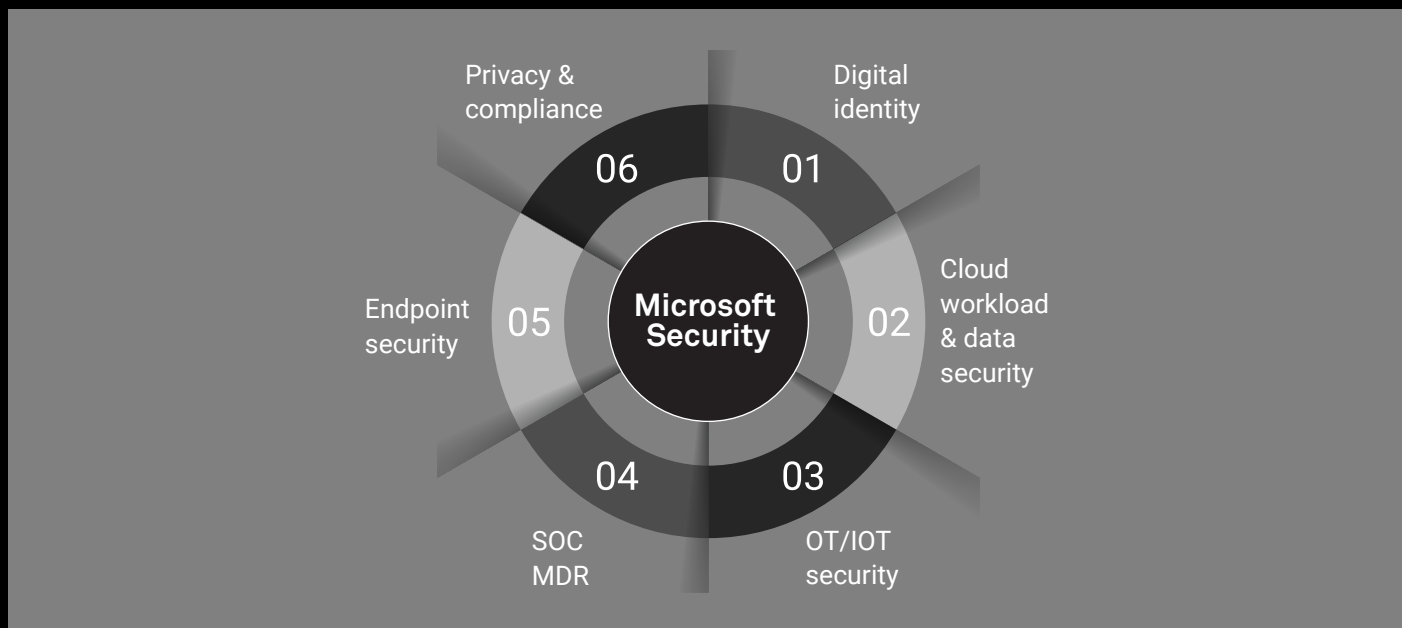

Figure 1:Wipro's Microsoft Security coverage

Microsoft offers a set of comprehensive cloud and analytics powered security solutions through Azure and M365 security. This greatly helps protect enterprise users, devices, data, apps and infrastructure with reduced cost and complexity.

## Wipro's offering

Wipro helps organizations to strategize, design and rapidly deploy comprehensive security and compliance controls leveraging the Microsoft security stack. Wipro's managed services for the enterprise workplace and Azure / multi-cloud workloads are secure and compliant through efficient monitoring and remediation.

Our Microsoft security offering coverage includes:

-  Security assessment/workshops, zero-trust aligned strategy and roadmap for Azure and M365 adoption
-  Digital IAM transformation using Azure Active Directory for Business-to-employee (B2E), Business-to-business (B2B) and Business-to-consumer (B2C)

-  Modern workplace security and compliance transformation leveraging M365 security, compliance and privacy management
-  Secure landing zone for Azure cloud workloads (i.e.: enterprise apps, SAP etc.) and continuous security and compliance monitoring and remediation leveraging automation
-  Implement compliance controls such as PCI DSS, NIST or CIS for Azure workloads
-  Information protection, governance, privacy and compliance program strategy, implementation and service leveraging M365 and Wipro's frameworks
-  Managed SOC MDR service leveraging Azure Sentinel, Microsoft XDR and Wipro's accelerators
-  OT/IoT security leveraging Microsoft Defender for IoT and Wipro's partner solutions
-  Privacy by design and discovery of privacy data risks and mitigation services leveraging M365 Privacy Management, Wipro's framework and integrated solutions

# Benefits/value delivered

1

End-to-end enterprise security solutions and services delivered through industry leading Microsoft security stack from one strategic IT services partner

2

Access to over 8,000 global cybersecurity experts, with over 1,000 Microsoft Security trained and over 500 Microsoft Security certified

3

Our CoE & IP-based solutions help our customers to streamline and improve cloud security adoption, control visibility, governance for application workloads and accelerate SSO applications on-boarding to Azure platform

4

Wipro's value-added solutions and integrated service delivery to simplify, expedite and seamlessly implement security solutions, and provide 24x7 managed services support through Global Cyber Defense Centers.

5

2 decades of enterprise cybersecurity experience to bring a holistic and integrated security approach for public, private and hybrid cloud adoption

6

Deliver more innovations and rapid value-added services to our clients through strategic Microsoft partnerships
