

Quick Start Programs for Microsoft Cloud Security

Measurable, value-based cloud security in just weeks

Edgile's Quick Starts are a highly efficient way for clients to leverage their investments in Microsoft cloud platforms. The programs employ a fixed price, fixed scope, and fixed delivery methodology to produce measurable risk and security outcomes in the fastest and most predictable manner. Using templates and accelerators, Edgile's Microsoft specialists will deliver business-aligned solution builds that include:

- A definition of business requirements and drivers with their success criteria
- An analysis of detected data and identity risks in production platforms
- Security and governance controls deployed into production for immediate measurable risk reduction
- An operations plan and roadmap outlining next steps

Quick Start packages and pricing

Quick Starts are designed to minimize the engagement time required by key decision-making stakeholders.

PRICING AND DURATION	
Save up to 70% through Microsoft-funded incentives	
\$215,000	10 weeks
\$350,000	16 weeks
\$260,000	12 weeks
\$215,000	10 weeks

Microsoft Purview Data Security Quick Start

Basic

Classify sensitive information in M365 cloud workloads. Offers initial, measurable production deployment of Microsoft data security control frameworks to manage risk and reduce attack surfaces

Advanced

Includes all Basic option initiatives plus requirements definitions for sensitive data at rest on-premises and prevention of data loss in non-Microsoft cloud storage locations.

Microsoft Purview Insider Risk Management Quick Start

Delivers high-velocity, quantifiable insider threat management capabilities into the M365 environment in a predictable and measurable timeframe by deploying the Insider Risk Management module for M365.

Microsoft Entra Entitlement Management Quick Start

Offers an immediate production deployment of the Entra and Azure Active Directory Entitlement Management toolset to manage identity capability and risk in your Microsoft cloud platforms.

Quick Start deliverables

Analysis of the production risk that must be mitigated, and the steps to mitigate it

An operations plan with organizational and technological requirements defined

A strategic roadmap for what to do next and the sequencing of dependencies

Accelerate business-aligned cloud security solutions

As a Microsoft Gold Partner with deep expertise across the entire Microsoft ecosystem, Edgile knows how to configure Microsoft's cloud technologies through a highly efficient and predictable process. We know how long it will take and how much it will cost for a client to achieve immediate, high-velocity data security outcomes.

BUILD PHILOSOPHY

Data-driven Decisions

Rapid Production Deployment

Operations Plan & Roadmap

Measurable Security Outcomes

APPROACH

Configuration without customization

Utilize pre-defined templates, configurations and workflows for best practice builds without time-consuming, complex customization

Expert enablement guidance

Learn optimal implementation methods to maximize solution productivity and effectiveness.

Measurable security outcomes

Leverage value-based outcomes to create a business foundation for scaling capabilities across the enterprise.

STEPS TO SUCCESSFUL IMPLEMENTATION

Actions to take

- ✓ Document current state details and processes up front
- ✓ Identify stakeholder understanding and vision of problems/solutions
- ✓ Focus on rapid production monitoring and protections

Actions to avoid

- ✗ Code customizations designed around a manual or legacy approach
- ✗ Complex processes with significant interdependencies across other systems
