Business-aligned identity governance for today's cloud

As the cloud delivers solutions to lower costs, increase business agility, and enable mobility, challenging problems are also created. The modern enterprise is often under cyber attack—increasing risk in highly regulated industries—and many organizations aren't aware of the scope of shadow IT involved. With the emergence of the any-device-anywhere paradigm, inconsistencies in Identity and Access Management (IAM) can result in security breaches and regulatory non-compliance. Today's enterprise demands an identity-focused cloud environment that easily supports governance and remediation.

Technology alone isn't enough to secure the cloud with successful identity governance. Too often, security officers struggle to fit their cloud program into the constraints of an earlier technology choice. Large, complex organizations need to align their business goals to a strategic roadmap that focuses on people, processes, and data in order to determine appropriate product investments. Strategic planning, holistic design, and efficient implementation are equally critical for a cloud program's success.

Cloud Jumpstart by Edgile

Cloud Jumpstart provides a business-aligned strategic roadmap—with a customized IAM program supported by expert implementation services—for secure and compliant enterprise-wide shifts. Designed to serve organizations in highly regulated industries, Cloud Jumpstart assesses your company's unique situation to develop a forward-thinking solution that addresses identity provisioning, automation, and governance—while incorporating new functionality quickly and efficiently.

Microsoft Azure and SailPoint

Cloud Jumpstart combines Edgile's proven strategy-first approach with Microsoft's Azure Active Directory IAM solution and SailPoint's Identity Governance Platform. The integration of SailPoint and Azure Active Directory—combined with Edgile's expert consulting services—delivers powerfully customized hybrid functionality. Edgile's Microsoft-SailPoint strategy is a cost-saving framework for business productivity, agility, and security.
