

RISK AND SECURITY

# Decision Engine App

Accelerate and automate workload migrations to the cloud

Elite

## Automate your decision planning process

Business initiatives such as moving new applications to the cloud, developing new products, entering new markets or simply classifying data rely on a structured decision process. To make it work, the development and operations teams driving the decision process need actionable requirements from numerous stakeholders across the enterprise. Gathering and organizing these requirements in a timely and efficient manner is often a challenge.

## Edgile's Decision Engine app for ServiceNow offers a solution

The Decision Engine integrated into ServiceNow can harmonize multiple siloed business functions and intake processes allowing your organization to rapidly and consistently provide input on privacy/availability and encryption requirements, access controls plus vulnerability scanning and code review.

The result is intelligent, automated decisioning with risk and compliance considerations that can help accelerate migration of workloads into the cloud.

**edgile**  
Decision Engine

**Decision Engine App** capabilities include:

- ServiceNow integration
- Strategic question intake
- Approval tasks
- Fulfillment tasks
- Streamlined processes
- Notification management

## Measure and optimize your business rules and decisions

### 1 Operational Need Identification

Identify operational project needs that require flexible and extensible planning considerations

### 2 Intake Processing

Tailor intake questions and define criteria to satisfy multiple requirements in a consistent manner

### 3 Decision Computing

Edgile's Decision Engine generates automated ratings, outlays required follow-on approval and fulfillment tasks, and embeds notification plus reporting capabilities

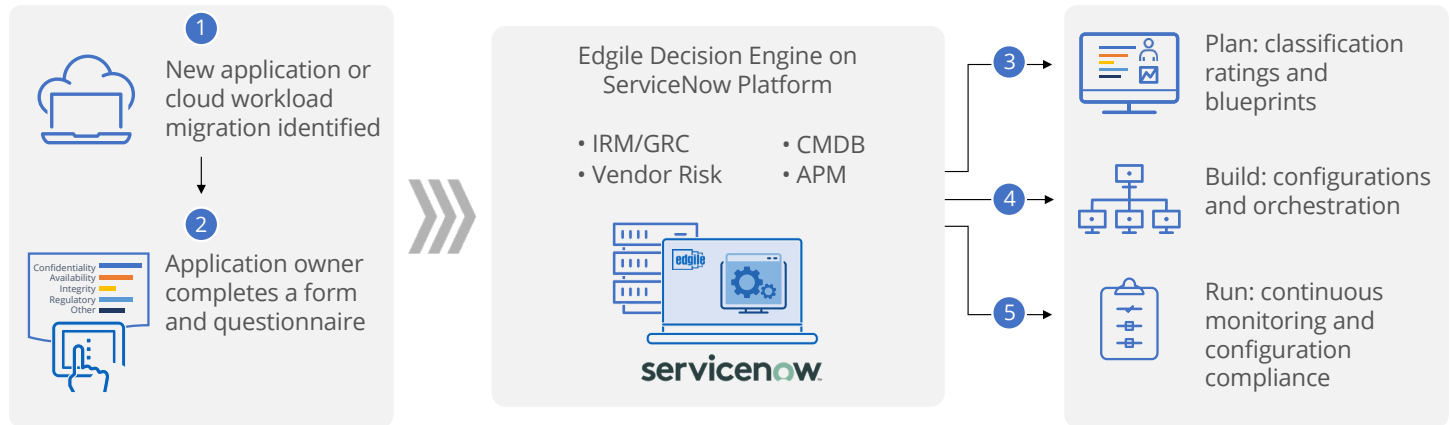

### 4 Auto-Generated Follow-On Tasks and Reporting

Leverage cross-functional, integrated, closed-loop decision making process to realize quick time-to-value; Continuously monitor and track initiatives within ServiceNow

# A strong build philosophy helps to deliver incremental quick wins

Edgile's approach follows a five-step closed-looped process to automatically rate confidentiality, integrity, availability, regulatory, and other requirements.

## With Edgile's Decision Engine app your business gets:

- ✓ A single, easy-to-understand on-boarding process
- ✓ Intake parameters targeted to optimize cross-functional workflows
- ✓ Automated ratings that eliminate subjectivity
- ✓ A centralized launchpad to enable organizational intelligence
- ✓ Sequential approval/fulfillment workflows with integrated notifications
- ✓ Embedded dashboard reporting for visibility into timelines and completions
