Preventative Cybercare is Good Medicine
for your Security Program

Today's cyber attacks are inside the networks for over 200 days before they are detected. Don't let limited resources stall a security program that will provide the protection your business needs to survive and thrive. Learn from Edgile why identity has moved to the center of the security strategy. With Edgile and our proven healthcare security approach, you can power up a quick and effective program launch.

Edgile's organizational accelerators help healthcare CISOs define clear roles and responsibilities for their teams, and provides benchmark comparisons to industry peers.

Identity and Governance Strategy Accelerators

Security Strategy

A top down strategy will help you prioritize your security investments. Let Edgile's Security Strategy accelerators help you set a true north compass for your healthcare organization.

GRC Strategy

Edgile can help you organize your GRC program (e.g., Security, ERM, ORM, BCP, Vendor, Audit) and identify areas to optimize or develop tailored to your specific situation.

IAM Strategy

Healthcare Identity and Access Management (IAM) needs are very different from other industries' needs. Edgile's proven approach to healthcare IAM will help you achieve your business goals.

Regulatory Compliance Program Accelerators

Governance

Edgile has solutions for enabling improved security governance including healthcare security charters, policies, and standards accelerators.

Risk and Compliance Management

Edgile has proven risk management accelerators for healthcare including, among others, a rationalized set of controls for addressing dozens of regulatory requirements (e.g., HIPAA, HITECH and Meaningful Use).

Identity and Access Management

Edgile's Service Catalog accelerator helps make security standards more accessible through a set of well-defined and published security services.

Edgile Capabilities Framework for Healthcare

Our solutions are designed to take a risk-based approach to compliance and controls — you will have clear linkage to regulatory requirements. Your policies and standards will be informed by them as will your overall security program. Your IAM strategy will ensure the related OCR HIPAA Audit Procedures can be addressed, and your GRC strategy will ensure your EMR system can meet Meaningful Use requirements. With the increased visibility and analytics capabilities, you will be better informed to make smarter business decisions.

Assurance Management

- Risk Management
- Compliance Management
- Audit Management
- BCP and DR

Identity and Access

- Provisioning and De-Provisioning
- Role Management
- Attestation and Certification

- SDLC and Software Acquisition

Benefits of Edgile's Healthcare CISO Accelerators

Tailored for Healthcare

Edgile specializes in healthcare security and understands the operational realities of clinical environments, the healthcare culture, and the evolving standard of care around security safeguards. Our healthcare accelerators take a precise industry-specific perspective.

Continual Compliance

Edgile provide subscription services to regulatory content to keep your security and compliance programs up-to-date. In an ever changing regulatory environment Edgile is your partner to ensure your organization has a proactive program to stay ahead of compliance audits.

Clear Linkage to Laws and Regulations

Using our solutions, you will have clear linkage to regulatory requirements. Your policies and standards will be informed by them as will your overall security program.

High Value

Edgile's reputation in healthcare is born out of years of experience helping numerous CISOs achieve their business goals. We would welcome the opportunity to help you accelerate the success of your security program.
