# Edgile's Microsoft 365 Security and Compliance Solution

Integrated Risk Management

## Ensure a secure and compliant shift to the cloud

Enterprises are moving workload to the cloud at an increasing pace in order to maximize productivity, deepen collaboration, and reduce costs. Historically, security has been a major inhibitor slowing the shift. But today, security is leading—driving the move to the cloud for the intelligence and automated protection that only comes from machine learning.

Done right, security becomes an enabler that can safeguard the business while promoting growth in new areas. As a trusted Microsoft Gold security partner with a team that includes Microsoft-appointed MVPs, we've partnered with large enterprises since 2001 to design and implement winning strategies across identity, governance and compliance, and integrated risk.

Edgile's Microsoft 365 Security and Compliance Solution delivers a strategy-first approach aligning IT with compliance and privacy across the enterprise—from strategy, to migration, to ongoing operations.

> Over **90%** of the Fortune 500 are using **Microsoft cloud services** today.

### Strategy

A business-aligned strategic roadmap and security program supported by expert implementation services for secure and compliant enterprise-wide shifts.

### Accelerated Transformation

A fast and efficient move to Microsoft 365, including file share migration and data management along with application-level attestation using SailPoint solutions.

### Managed Security & Compliance Services

Managed security services supply the ongoing security expertise and organization support required to securely run enterprise cloud implementations.

# Migrating to Microsoft 365

Edgile's integrated three phase expert program gives you the intelligent Edge.

## 1  iGRC Content

Edgile's content library accelerates an organization's understanding of compliance requirements by providing a harmonized set of industry-specific laws and regulations integrated with internal policies. The content is regularly updated to include new statutes, regulations and standards in risk and compliance.

**Supported Statutes, Regulations & Standards**

Risk and Compliance Program: GDPR, GLBA, SOC2, SOX, PCI, HIPAA, FISMA, NIST, ISO/IEC

Healthcare: HIPAA, HITECH, Privacy, 21 CFR 11, GXP

Retail: NIST, ISO/IEC, Privacy laws, PCI Compliance

Financial Services: GDPR, GLBA, FFIEC, FDIC, NY DFS Cyber, NIST, FINRA, SEC, SOX, SOC2

## 2  Diagnostics

Technology diagnostics offer insights that answer the tough CISO questions.

• Is our technology secure?
• Are we compliant with cybersecurity regulations?
• Where are our largest technology capability gaps?

## 3  Cloud Configuration

Edgile delivers configuration settings to ensure compliance based on the clients unique governance, risk and compliance requirements.

• Are the cloud services in compliance with all relevant requirements?
• What is our risk profile for our hybrid cloud environments?
• How will we provide assurance services for this new hybrid cloud world?

## Biggest Cloud Security Threats

**62%**
Misconfiguration of the cloud platform/wrong setup

**55%**
Unauthorized access

**50%**
Insecure interfaces/APIs
