

## We solve the cloud to minimize your cyber risk

While the cloud offers lower costs and increased business agility, new security and compliance issues need to be addressed to successfully make the shift. Effectively securing workloads in Azure public cloud requires a strategy that integrates people, processes, technology, and data—all while aligning business objectives with regulatory compliance mandates.

## Edgile's 3-phase Azure cloud program

We deliver Azure cloud lifecycle services, from security strategy and planning through optimized migration and ongoing support operations.

### I. Strategy: Cloud Jumpstart

Our Cloud Jumpstart program delivers a business-aligned strategic roadmap alongside a customized IAM strategy—all supported by expert implementation services.

### II. Accelerated Migration

We accelerate the shift to Azure, optimizing file share migration, data management, and application-level attestation using SailPoint solutions.

### III. Managed Security Services

Our managed security services—with Redmond-based resources—provide ongoing security expertise and operational support to securely run enterprise-grade cloud implementations.

## Holistic cloud security for Azure

Supported by expert advisory and implementation services, our proven strategy-first model leverages both traditional and cloud-native security controls to optimize your Azure environment.

Taking a holistic design approach, we apply a 32-point functional requirements framework to uncover and remediate security vulnerabilities—ensuring full transparency and an optimized risk posture.

# Business-aligned Cloud Security Services for Azure

## CISO/CFO Support

- Capital allocation planning
- Asset optimization (product, service, staff)
- Strategic goal analysis and attainment tracking
- Current state management (design, inventory)
- Ongoing Azure roadmap and advisory service

## Strategy and POC

- Design enterprise-level security strategy for cloud utilization
- Develop mobility management policy
- Design conditional access policy and design
- Execute POCs to refine approach

## Suspect Shadow IT?

Ask Edgile about our shadow IT discovery and remediation program, co-created with highly regulated clients.

## Accelerated Transformation "Lift and Shift"

- Accelerate time-to-value realization by implementing proven, compliant patterns
- Reduce and manage project risk
- Revise IT security policy to reflect new cloud environment and updates service catalog
- Implement end user adoption management program to assure user satisfaction

## Cybersecurity

- Enterprise-grade security design shifting to Azure PaaS model (and away from multitude of point solutions)
- Protect, detect, and respond capabilities leveraging state-of-the-art Azure Security Center
- Firewall and gateway management
- Event and log analysis, response support
- Multifactor authentication support

## Operational Support

- Identity management functional tasks
- Onboarding SaaS apps SSO configuration
- Entitlement management
- Customization of Azure Information Protection (encryption) templates for multiple departments
