5-DAY QUICK START

Microsoft Cloud Adoption Security Strategy Workshop

Secure your cloud-enabled modern workplace

Identity

Information

Risk and Compliance

Stay ahead of the digital transformation curve

The growth of digital technology, the rapid shift to a remote workforce, and information that is expanding exponentially beyond traditional borders means cloud adoption is no longer an option. It's a must-have for innovative companies focused on improving business outcomes and securing sensitive data everywhere.

Is your cloud strategy securely moving your organization fast enough to outpace the competition?

Edgile—Microsoft's #1 security and compliance partner—will accelerate and securely enable your cloud adoption

This 5-day Microsoft Quick Start Security and Cloud Adoption Strategy workshop, delivered by Gold Partner Edgile, offers a balanced approach for accelerating your cloud adoption while closing security gaps and enhancing work experiences for internal and external users.

The workshop, which can be delivered virtually or on-site, will help your teams:
• Gain a high-level understanding of your cybersecurity and IT visions, strategies and priorities
• Identify the current state business environment as it relates to technology and cybersecurity architecture, risk profiles, operations, regulations, and partners
• Develop a future state aligned to your business and technology needs
• Build a roadmap that prescribes a clear cloud adoption path geared to your business objectives
• Quickly understand M365 E3 and E5 security features to reduce risks

The workshop is available for a limited time and Microsoft covers all costs for eligible customers.

Cloud acceleration value

• Secure operations under normal and disruptive conditions

• Enable and secure a geographically distributed workforce, including cloud and on-premises application access for employees and third party users

• Enhance the ability to efficiently manage risk through improved risk intelligence

• Proactively protect the organization from continuously evolving threats, such as ransomware, malware, stolen credentials, and malicious insiders

• Streamline operations and reduce costs with optimized processes

Gain insights across 21 capabilities in:
• Risk and Compliance
• Authentication and Authorization
• Attack and Data Protection
• Monitoring and Reporting

Workshop timeline and key outputs

Edgile takes a strategy-first approach that aligns IT and business objectives with compliance and privacy across the enterprise—from strategy, to migration, to ongoing operations.

We will perform an analysis of your current state cloud security controls, capabilities and maturity using our proven security framework. A tailored cloud security strategy with actionable roadmap will accelerate the adoption of M365 capabilities enabling risk reduction across the enterprise.

Your key stakeholders will need to be present for only 1-2 hours each workshop day.

| Day 1	Day 2	Day 3	Day 4	Day 5
Current State Assessment	Future State Vision	Validation & Priority Setting	Implementation Roadmap	Executive Presentation
Key Outputs	Key Outputs	Key Outputs	Key Outputs	Key Outputs
• Finalize maturity level across 21 capabilities • Finalize risk heatmap for 21 capabilities • Develop high-level gaps and risks	• Future state tactical and wish list documented • Gaps documented between future state and current state	• Document list of priorities against gaps, risks and capability areas • Document sequence of priorities noting key assumptions and dependencies	• Mapping current technologies to MS EMS E5 capabilities • Begin high-level implementation roadmap	• Finalize implementation plan and benefits • Document quick wins for momentum • Develop SOW for next engagement

Ready to get started?

STEP 1: Check eligibility requirements

This Microsoft Workshop is open to US-managed customers that:
• Have O365 but have not yet turned on key workloads (Teams, SharePoint, OneDrive)
• Currently under-consume Microsoft Azure
• Own EMS or M365 E3 or E5 with low consumption or that are looking to upgrade to E5
