We secure the modern enterprise in the evolving digital age

STRATEGY • IMPLEMENTATION • MANAGED SERVICES

Driving alignment between business and security

The future of business is being driven by cloud computing, virtual workforces, and dynamic collaboration technologies—all with mobility expectations. As software vendors and service providers continue to flood the market with game-changing products, new security and compliance problems are created. In this rapidly evolving environment, data protection and cybersecurity are more important—and more difficult—than ever.

As the enterprise's traditional perimeter continues to break down, reacting to security events with one-off point solutions is no longer an option. A proactive, strategy-first approach is essential to move security programs beyond risk mitigation into secure, future-proofed business alignment. As your trusted partner, we start with your organization's business goals to build an identity-centric security strategy that minimizes risk while maximizing outcomes.

What we do

We design, implement and manage secure digital transformations across large enterprises with a focus on identity, cloud security and compliance.

Identity and Access Management
We enable identity management controls in the cloud for all users, including employees, partners, third party vendors, and clients.

Information and Cloud Security
We securely implement industry standard platforms like Azure and Microsoft 365 with existing investments for a coordinated, comprehensive and cost-effective security program.
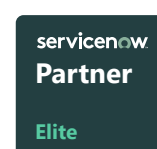

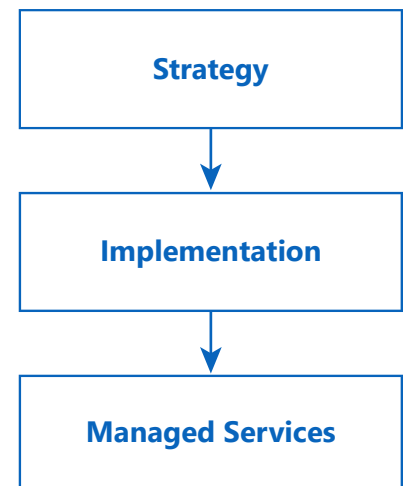

Risk and Security
We help compliance and privacy officers achieve parity between current and future processes while staying up-to-date with evolving state, federal and global regulatory mandates.
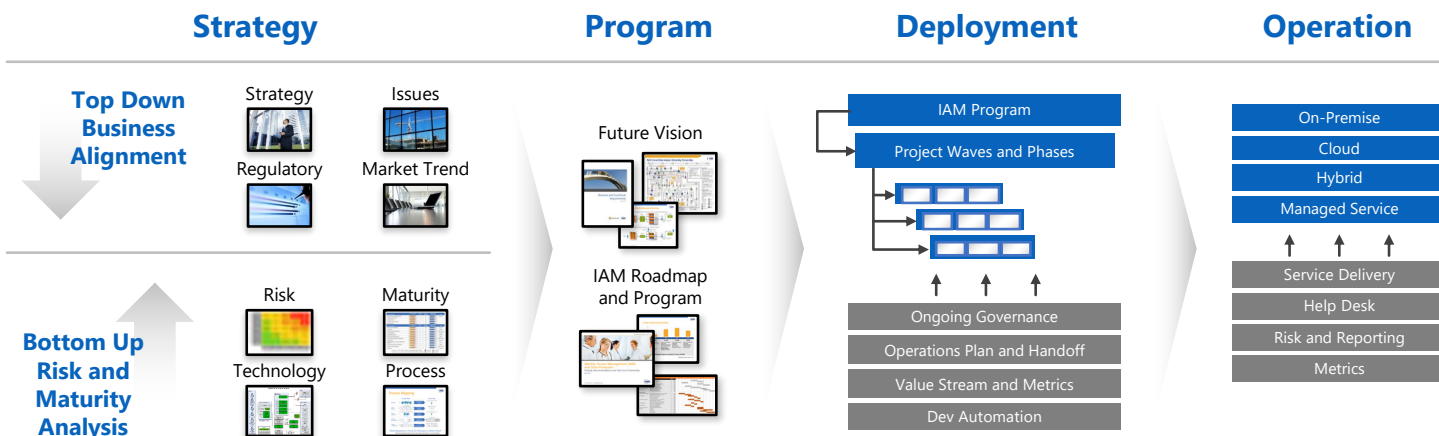

Cloud Security
Identity
IRM/GRC

How we do it

We provide a strategy-first approach to drive program success.

Edgile's Strategy-First Approach

Our strategy-first approach defines where the organization stands, where it needs to go, and the multi-year path to get there—while communicating business outcomes. It requires teams to look beyond technology and incorporate enterprise-wide business perspectives.

	Strategy	**Program**	**Deployment**	**Operation**

Top Down Business Alignment

Strategy · Issues · Regulatory · Market Trend

Bottom Up Risk and Maturity Analysis

Risk · Maturity · Technology · Process

Program: Future Vision · IAM Roadmap and Program

Deployment: IAM Program · Project Waves and Phases · Ongoing Governance · Operations Plan and Handoff · Value Stream and Metrics · Dev Automation

Operation: On-Premise · Cloud · Hybrid · Managed Service · Service Delivery · Help Desk · Risk and Reporting · Metrics

Edgile Services

As the trusted cyber risk and regulatory compliance partner to the world's leading organizations, Edgile provides strategy, implementation, and managed services. Our experienced solution architects and consultants have deep expertise in the most relevant service offerings across three broad practice areas—GRC, Cloud, and IAM—allowing us to increase business agility and create a competitive advantage for our clients.
