System Integrator  
of the Year

MICROSOFT CLOUD ACCELERATOR PROGRAM

# Edgile Microsoft Identity Workshop

Protect and secure user identities and devices

Security

Identity

Compliance

## Managing identities in a hybrid environment

Employees require quick and convenient access to essential applications. But business operations are becoming more complex. Remote work is expanding. Users and devices are multiplying. Cloud apps must integrate with legacy on-premises apps. In this hybrid environment, it's becoming harder for companies to manage access and maintain security and compliance.

## Edgile—Microsoft's #1 security and compliance partner—will improve your identity posture

The increasing use of personal devices and remote work creates a situation where data is no longer centralized behind traditional network security, raising your risk of identity attacks.

This one-day Microsoft Identity Workshop, delivered by Gold Partner Edgile, will demonstrate why identity is a fundamental pillar of an integrated, end-to-end security strategy. Edgile identity governance experts will show you how to provide the right access to the right people at the right time and lower your data breach and compliance risks.

The workshop is geared for security decision-makers, including CISOs, CIOs, CSOs and IT teams. We'll help you leverage the Microsoft 365 tools you already own to protect user identities, authenticate credentials and manage file access while maintaining efficient, collaborative workflows across cloud and on-premises environments.

# 87%

OF ORGANIZATIONS  
BELIEVE THAT

**IDENTITY  
IS CRITICAL**

IN MANAGING  
THEIR OVERALL RISK.

- 2019 Identity and Access  
Management Report

### Optimize identity

Identify potential risks related to identity and see opportunities for improvement.

### Assess security posture

Receive a numerical rating of your security posture and see how it compares to similar organizations.

### Reduce costs

Minimize expenses associated with password reset and helpdesk resources.

### Increase visibility

Get a sample survey of apps your employees are using and if IT supports them or not.

*The workshop is available for a limited time and Microsoft covers all costs.*

# Ready to get started?

## STEP 1

### Check eligibility requirements

This Microsoft Security Workshop is open to US-managed customers with:

- 1,000+ Azure Active Directory Premium (AADP) Paid Available Units (PAU);
- Customer TPID.

Customers are eligible for one Microsoft Cloud Accelerator Program workshop per fiscal year.

## STEP 2

### Contact Edgile

To learn more about how Microsoft 365 security can improve your business outcomes, please contact the Edgile representative in your area.

### Explore more security programs

Expand and integrate your security initiatives with these valuable Microsoft-funded engagements, delivered by Edgile: Compliance Workshop; Identity Workshop; Microsoft 365 Assessment/POC. For details, visit [edgile.com/microsoftprograms](https://edgile.com/microsoftprograms)

### FastTrack for Microsoft 365

Claim your FastTrack benefits, including deploying new cloud capabilities and accessing Microsoft and Edgile engineering expertise at no cost for the life your license subscriptions. Visit [edgile.com/fasttrack](https://edgile.com/fasttrack)

### Edgile: We Secure the Modern Enterprise<sup>SM</sup>

Edgile is a Microsoft Gold Partner in Security and Compliance and 2020 Microsoft Security System Integrator of the Year. Our strategy-first approach to identities, access and cloud security accelerates customer journeys to the cloud. Using a risk-based methodology, we provide customers a framework to prioritize controls implementation throughout their digital transformation. Edgile secures the modern enterprise with solutions that increase business agility and turn risk into opportunity.
