

# Entra ID Governance for Healthcare

A single, enterprise-grade, cloud-native solution for identity security with Epic integration

## Enterprise IAM with EHR integration

IAM options for healthcare providers have been limited, costly and only marginally effective because few products integrate with the EHR system. Microsoft Entra ID changes that. It provides a single identity security solution for tall communities that supports audits and integrates with leading EHRs.

### Entra ID allows users to:

- Lower costs by eliminating point IAM solutions and combining IAM and SSO
- Simplify operating environments using standard Microsoft technology without the need for specialists
- Manage all user communities with one system for employees, affiliates and students
- Leverage full interoperability with automation, visibility and recertification through tap and go systems

### In just 4 weeks

- Develop a deployable model for Entra ID with Epic (Cerner pending)
- Develop an ROI program based on defined actions
- Take steps to harden your environment against attackers and recover quickly
- Enable native cloud solutions with hundreds of integrations fully aligned with Microsoft strategic roadmap

## Entra ID Identity Security Rapid Evaluation Program
